

LANA AT BAUMA 2013

As many years before LANA will be present at BAUMA 2013 in Hall A2 Stand 206.

LANA was founded in 1961, with its business focusing on the forestry and timber-sawing sector, being one of the pioneering cooperatives in the Mondragón Group (MCC).

Today, we are a firm that specialises in secondary timber-processing, as a European benchmark that provides innovative products and services for the building sector.

At LANA, we are committed to our customers, providing quality products that are both safe and competitive, along with an approachable and flexible service.

Innovation and continuous improvement in all areas (management systems, technologies, products and services), developed through teamwork, are the pillars upon which our success is based.
