EXHIBITOR TESTIMONIALS

“

This is our second large-scale project participating in the Mining & Metals Central Asia exhibition, and it undoubtedly attracts both regional and global leaders in the industry. We greatly enjoy participating, especially because we have an excellent opportunity to meet with our clients in an informal setting, not in offices, but at impressive booths. The interest in our products has been very high, and preliminary agreements for collaboration are already taking place.

Alim Zhubanov
METSO

“

For us, this is a great experience due to the strong international presence here, with companies from Germany, China, Russia, and the United Kingdom represented. I appreciated the international atmosphere and the large number of clients who attended the event, which provided us with valuable opportunities for meetings. We attracted several new clients and made significant progress in our meetings with our existing client base.

Fatoğlu Celik Yasemin
WEIR MINERALS

“

Participating in the exhibition has left us with exceptionally positive impressions. For the first time in the last eight years, we are showcasing our company at such a significant event. It is a unique platform that allows us not only to demonstrate our capabilities but also to assess the competitive landscape and identify key trends. The results have exceeded our expectations: preliminary agreements for collaboration have already been reached, which can be considered a significant success.
