ANMOPYC

SPANISH MANUFACTURERS
ASSOCIATION OF CONSTRUCTION
AND MINING EQUIPMENT

PRESENTATION

ANMOPYC, the Spanish Manufacturers Association of Machinery of Construction, Public Works and Mining Equipment, is the leading national cluster in the machinery and auxiliary equipment sector for the extractive and construction industries.

ANMOPYC currently comprises more than 160 members representing all stakeholders in the supply chain: manufacturers, importers, and distributors.

Since its founding in 1982, it has represented and defended the interests of the sector and works to support and drive its members' transition to a green, digital, and resilient economy.

ASSOCIATION OF CONSTRUCTION AND MINING EQUIPMENT

GENERAL ASSEMBLY

Our General Assembly is a strategic event in where we annually bring together all our associates and collaborators, as well as institutions, associations, related companies and the specialized press.

It is a space where we strengthen our role within the industrial and technological ecosystem, share experiences, foster interaction and generate new opportunities for collaboration.

Edition 2026: more than 230 professionals

ANMOPYC
SPANISH MANUFACTURERS
ASSOCIATION OF CONSTRUCTION
AND MINING EQUIPMENT

ACKNOWLEDGMENTS

ANMOPYC has important institutional recognitions that endorse its work, its representativeness and its commitment to the internationalization and innovation of the sector.

GOBIERNO DE ESPAÑA
MINISTERIO DE ECONOMÍA, COMERCIO Y EMPRESA
ICEX

GOBIERNO DE ESPAÑA
MINISTERIO DE INDUSTRIA, COMERCIO Y TURISMO

ICEX Collaborating Entity

ANMOPYC is recognized as a Collaborative Entity of ICEX as an exporting association that develops foreign promotion activities within the construction and mining machinery sectors and has a substantial export representation.

ICEX and ANMOPYC work together to promote Spanish machinery abroad, developing an annual action plan that includes different types of activities to boost sales of Spanish equipment overseas.

Innovative Business Group (AEI)

ANMOPYC has been registered since July 5, 2011 in the national register of Innovative Business Groups (AEI) of the Ministry of Industry, Trade and Tourism (MINCOTUR), having renewed its registration in 2023 after receiving a positive assessment of the Strategic Plan 2023-2026 that sets the roadmap of the Association for the coming years.

ANMOPYC
SPANISH MANUFACTURERS
ASSOCIATION OF CONSTRUCTION
AND MINING EQUIPMENT

WHAT WE DO

1. Promotion and Dissemination

- Internationalization
- Attendance at trade fairs
- Direct and reverse missions
- Market intelligence and prospecting
- Promotion and dissemination in specialized press, website and social networks

2. Consulting and Technical Advice

- Technological monitoring
- Risk assessment, safety studies on machinery, equipment and complete facilities
- CE Certification
- Participation in national and international standardization committees
- Specialized Consulting

3. Lobbying and representation

- The only association in the sector at the national level
- Defending the interests of the sector, its needs and initiatives
- Representation of the sector before institutions, organizations and administrations
- Promotion of joint projects, collaboration between companies, exchange of experiences

4. Technological innovation

- Active participation in public R&D funding programs
- Coordination and participation in national and European projects
- Consulting, management and dissemination
- Technical workshops and seminars

ANMOPYC

ASSOCIATION OF CONSTRUCTION
AND MINING EQUIPMENT

INTERNATIONAL PROMOTION

We support companies throughout their entire process of expanding into international markets

1	PLANS	Development of internationalization plans
2	FAIRS	Assistance and support at international trade fairs
3	MISSIONS	Organization of direct and reverse missions
4	BUYERS	Reverse trade missions for press and buyers
5	MARKETS	Market and sector intelligence and prospecting
6	COMPETENCE	Competitive analysis and monitoring

ANMOPYC
SPANISH MANUFACTURERS
ASSOCIATION OF CONSTRUCTION
AND MINING EQUIPMENT

INTERNATIONAL PROMOTION

Direct relationships that open markets and build trust

1 DIRECT MISSIONS
Prospecting, B2B meetings and visits to priority markets.

2 STUDY MISSIONS
Knowledge of trends, channels, and opportunities.

3 REVERSE MISSIONS
International buyers and press are aware of the Spanish offer.

ANMOPYC
SPANISH MANUFACTURERS
ASSOCIATION OF CONSTRUCTION AND MINING EQUIPMENT

INTERNATIONAL TRADE FAIRS

Organization and management of participation in the main events of the sector

GLOBAL PRESENCE

We connect Spanish companies with buyers, influencers, and opportunities in key markets.

INTERNATIONAL TRADE FAIRS

Agreements with the main trade fairs in the sector

These agreements involve the promotion of events by ANMOPYC, and the fair offers promotional stands for the Association at these fairs to disseminate information about our companies and their products.

BAUMA NETWORK

BAUMA, held in Munich every three years, is the world's largest trade fair for the construction, public works, and mining sectors, as well as all related industries and services. In addition, there are international editions of the fair: Bauma CHINA in Shanghai, Bauma Conexpo India in New Delhi, and M&T Expo in Brazil.

Europe

In addition, in Europe we collaborate with SMOPYC in Spain, INTERMAT in France and KOMATEK in Turkey, leading trade fairs in the sector.

America

In America, our interlocutors are the trade fairs: WORLD OF CONCRETE, CONEXPO-AEM, MINEXPO, AED-CONDEX and IDA.

Asia

In China, we collaborate with BICES Beijing, organized by the Chinese Manufacturers Association, ANMOPYC's counterpart.

In Japan, CSPI EXPO Tokyo, organized and sponsored by the main Organizations and Institutions of the sector.

LOBBYING AND REPRESENTATION

The national voice of manufacturers in front of the administrations

THE ONLY NATIONAL ASSOCIATION IN THE SECTOR

ANMOPYC is the only national association that specifically represents the construction and mining machinery sectors in Spain.

Our active involvement in the main organizations of the sector allows us to act as a recognized interlocutor and defend the interests of our members before institutions, organizations and public administrations.

Institutional defense and representation

- We defend the interests, needs and initiatives of the sector.
- We represent the sector before institutions, organizations and public administrations, both at national and European level.
- We influence the development of policies, regulations and industry programs to actively advocate for the interests and needs of our associates.

Sector collaboration and strategic positioning

- We promote joint projects that foster collaboration between companies in the sector.
- We promote the exchange of experiences and knowledge.
- We share government inquiries and requests for information on matters affecting the industry with our associates as a matter of priority.

ANMOPYC
SPANISH MANUFACTURERS
ASSOCIATION OF CONSTRUCTION AND MINING EQUIPMENT

LOBBYING AND REPRESENTATION

The European voice of construction machinery

Through our membership in CECE, the European Committee of Construction Machinery Manufacturers, we represent the Spanish sector in front of the European Commission and Parliament.

ANMOPYC held the CECE presidency during 2024-2025.

- Active participation in the European Committee of Construction and Mining Machinery Manufacturers.
- Monitoring European regulations, sustainability, digitalization and competitiveness.
- Exchange of information and common positions with European national associations.
- Representation of the interests of the Spanish sector in the community sphere.

Industry Lobbying: Fostering Conditions for Growth

ANMOPYC's institutional activities aim to convey the industry's real needs to public agencies, business organizations, and decision-making forums

CECE

Alignment with the sector's European agenda and advocacy for manufacturers' competitiveness.

CEOE

Participation in business initiatives related to lifting, industry, and business representation.

MINTUR . Capital Equipment Plan 2026-2030

Improving productivity and modernize Spanish industry, particularly with regard to automation and the adoption of new digital technologies and artificial intelligence.

High-Level Forum on the Spanish Industry

Participation in forums for reflection and proposals on the future of the domestic industry.

CNC

Collaboration with the National Construction Confederation to align priorities among manufacturers, builders, and the value chain.

Machinery Renewal Plan

A plan to renew and modernize the construction equipment fleet to enhance safety on construction sites and improve the sector's ability to attract and retain qualified talent.

ANMOPYC
SPANISH MANUFACTURERS
ASSOCIATION OF CONSTRUCTION AND MINING EQUIPMENT

RENEWAL MACHINERY PLAN

Construction machinery is an essential lever to respond to the challenges that will condition the future development of the Spanish construction sector in its digital and green transformation process to improve its competitiveness.

AVERAGE AGE	% MACHINES	LIFESPAN
18,5 YEARS	79,1% OF THE PARK	10 YEARS

But the current situation of Spanish construction machinery is as follows:

ANMOPYC is in negotiations with the Ministries of Ecological Transition and Demographic Challenge, Transport and Sustainable Mobility, and Industry to achieve a national plan for the Renewal and Modernization of the Spanish construction machinery fleet that will allow us to reach the following objectives:

RENOVATION AND MODERNIZATION

OF THE SPANISH CONSTRUCTION MACHINERY PARK

1. **TECHNOLOGY AND INNOVATION** the new machinery for a direct increase in competitiveness.
2. **ENVIRONMENT** Reduction of up to 95% of polluting particles thanks to the new engines and improved energy efficiency.
3. **SECURITY** Strict regulation in the design and manufacture of equipment with operator protection systems.
4. **GENERATIONAL RENEWAL** Changing the negative perception of the sector among new generations, allowing them to work with the latest technologies and contributing to professional development.
5. **MARKET INCENTIVE** Promotion through grants or tax incentives for the renovation of equipment in compliance with European environmental and safety requirements.

ANMOPYC
SPANISH MANUFACTURERS
ASSOCIATION OF CONSTRUCTION AND MINING EQUIPMENT

INSTITUTIONAL RELATIONS

ANMOPYC collaborates with various Associations and representative Organizations of our industry at the regional, national and international level in order to create synergies and unite interests.

LEGISLATION AND STANDARDIZATION

We are corporate members of **UNE** (Spanish Association for Standardization) and **CECE** (Committee for European Construction Equipment) and actively participate in national standardization committees of interest to the sector and collaborate on key technical issues for the sector, such as safety, environment, digitalization, decarbonization.

This allows us to have first-hand information and to have access to and the ability to influence the content of regulations and technical standards relevant to our sector.

We work closely with various Directorates General of the Ministry of Industry to actively defend the interests of our partners, ensuring that their needs and priorities are represented in the formulation of industrial policies, regulations and programs.

UNE Normalización Española

CECE

We are part of the Spanish Technological Platform for Construction (**PTEC**), with whom we coordinate a Working Group on Machinery and Equipment, whose purpose is, through the creation of a technological innovation ecosystem in construction, to align the needs of the value chain of the construction industry and seek areas of collaboration to make construction processes more productive, safe and environmentally friendly.

PARTICIPATION AND LEADERSHIP IN TECHNICAL STANDARDIZATION

Participation in standardization committees allows ANMOPYC to influence the development of technical standards and ensure that the voice of the construction machinery sector is taken into account in their preparation.

- Participation in 9 UNE technical committees related to machinery and auxiliary equipment.
- Presidency of the National Committee for Standardization of Construction Machinery
- Contribution to the development of more than 20 technical product standards.
- Monitoring of more than 30 European and international technical standardization committees.
- New: Joining as an expert in European and international working groups on machine safety and hydrogen technologies

TECHNOLOGICAL INNOVATION

ANMOPYC actively participates in public funding programs for R&D&I, coordinating or participating in national and European projects, which promote collaboration between companies in the sector and research and technology centers in order to improve the innovative and competitive capacity of the national production fabric.

ANMOPYC also provides support to members in preparing their projects:

- Information and advice on financing instruments for R&D&I projects.
- Consulting activities for the preparation of aid applications.
- Comprehensive management of its acquisition.
- Monitoring and technical and economic justification.
- Dissemination of project progress and results.

H2MAC PROJECT

European Innovation Project

H2MAC was the winning proposal in the call "HORIZON-JT1-CLEANH2-2023-03-01: Real environment demonstration of non-road mobile machinery (NRMM).

Objective: Simultaneous demonstration for at least 1000 hours in a quarry (real environment) of two newly designed non-road mobile machines (excavator and shredder) powered by hydrogen fuel cells.

Total budget: €6.3M of which €4.9M will be financed by Clean Hydrogen Partnership and its members, under Grant Agreement No. 101137786.

Project duration: January 2024 to May 2028

M27 FOLLOW-UP MEETING

TALENT ACQUISITION

We promote and coordinate working groups that seek to create synergies between different companies, share information and foster cooperation with the aim of strengthening the sector and facing present and future challenges together.

Our goal is to be a benchmark of knowledge and a forum for dialogue within the construction and mining industry, connecting the machinery manufacturing sector with knowledge and/or technology provider centers in order to bring them closer to the trends that will shape their future.

We have organized some activities to gather information and identify training needs:

•Study among partner companies to understand training needs.

•National study of relevant training courses for member companies and where they are taught at training centres.

• Holding the 1st Competition for Future Professionals in Machinery and Lifting in collaboration with AFUPRO, the European Association of Future Professionals and the ELEVA alliance.

•We collaborate with the celebration of the Future Professionals Competition for Industrial Vehicles and Machinery, within the MOTORTEC 2025 fair.

•Formation of a Talent Commission.

ANMOPYC

BENEFITS FOR ASSOCIATES

We offer our members access to and preferential terms for the services and products offered by the companies and institutions we collaborate with, including:

- Services for the prevention of late payments, monitoring and management of risks, and support for financing
- Legal advice
- International logistics operations, especially at trade fairs and events
- Construction and decoration of stands
- International finance consultancy
- Training and talent
- Promotion and dissemination of news and updates
- Strategic consulting
- Purchase of standards and participation in courses at advantageous prices
- Collaborations with technology centers

Our goal is to offer tools, knowledge, and opportunities to boost the competitiveness and growth of our members.
